

# RESEARCH PARTICIPANTS NEEDED

We want to better understand health in children with Fetal Alcohol Spectrum Disorder (FASD) and Autism Spectrum Disorder (ASD). Health areas we are studying include: gut, immune, and brain health!

## WHO CAN PARTICIPATE?

- Children and youth (7-12) with an FASD diagnosis
- Children and youth (7-12) with an ASD diagnosis
- Children and youth (7-12) who do not have an FASD or ASD diagnosis

Children and caregivers will come to the Child Development Centre in Calgary to complete the study (~2 hrs)

Caregivers will complete questionnaires about the home environment and the child's health

Children will complete iPad games that assess cognitive (brain) function

A small blood sample will be collected and a kit provided for saliva ("spit") and fecal ("poop") sample collection at home (returned by mail)

Children and caregivers will be provided with a \$50 gift card for their time!
